PROJECTS

Nimble

www.nimblemanager.com

REACT | NODE | POSTGRESQL

- Full-stack project organization/management tool.
- Simple & intuitive UX/UI allows teams to collaborate efficiently with easy-to-use gestures, including drag & drop on tasks and lists.
- Inspired by Kanban Board methodology, users can organize ideas by projects, create custom lists & tasks, and add/manage project collaborators.

Keyboard Hero

www.keyboardhero.fun

REACT | NODE | POSTGRESQL

- A typing challenge game that tests a user's speed and accuracy.
- A fun full-stack web application which helps people improve their typing skills and compete with friends
- Designed to be intuitive and aesthetically pleasing.
